Dates Services Provided

November/December, 2007

Overview of Technology Assistance Request

The 17th Judicial Circuit, Winnebago County, Illinois, decided to replace the existing court and case management system and software applications within the courts and related offices. To this end, a team from within the County was assembled and prepared a *System Requirements Definition* (SRD) document that outlines minimum court and case management software functionality. Prior to issuing a Request for Information, the county requested that the IJIS Institute provide technical assistance in the form of a review of the Court and Case Management SRD and provide any feedback resulting from the review.

Type of Technology Assistance Services Provided

The IJIS Institute Technical Assistance Team performed an offsite review of the SRD document during November and December 2007. Since Winnebago's schedule was very tight and the nature of this assistance request did not justify an extensive onsite TA engagement, the effort was channeled through the IJIS Institute's Information Sharing Architecture Committee. The IJIS Institute's intent was to provide Winnebago County with the requested assistance while minimizing the cost of completing this requested document review and the impact on the heavily committed TA engagement schedule.

Overview of Observations and Recommendations

A copy of the TA report can be found on the IJIS Institute website at www.ijis.org.
